This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. # PREFACE.

SIX years ago I contemplated a voluminous history of the Hundred of North Erpingham, in the county of Norfolk; and finding my MS. collections had accumulated to an inconvenient extent, so much so, in fact, that it was difficult to get them into shape, or to find what I wanted, I determined to print them, rough as they were, solely for my own convenience, so that I might get them indexed for my own use when I began to write my big book. The printing of my notes has gone on till I have now printed them all; and with this part I issue indexes to them, which will make them easy enough to consult.

These collections, and their indexes, have been the greatest use to me in compiling the History of the Parish of Cromer, which I have just published, and which will serve as a specimen of the way in which I hoped to have written the History of the whole Hundred. It is, I fear, however, very unlikely I shall go on with my task, as I have many other irons in the fire; but I venture to hope that these rough notes, now that they are indexed up, will be of use to anyone interested in the history of this corner of Norfolk, and especially to genealogists.

As far as bulk is concerned, they contain 761 pages, whereas Blomefield's (Parkins) account of the same Hundred

Digitized by Google

contains 106 pp. only; so, with the indexes, there is over seven times as much here as in our county history. When, from these pages and from other sources I compiled the account of Cromer I have just mentioned, it stretched into 280 pp. 4to., and as there are over thirty parishes in the Hundred, it began to dawn upon me that in undertaking to write the history of the whole Hundred, on the same scale, I had half committed myself to the compilation of a work larger than the whole of Blomefield—too great a job for a busy professional man. I have printed a good deal of calendar, &c., about Norfolk; * but this struck me as being rather too large an enterprise.

For the very numerous misprints, especially in the first part of this work, I must apologize, and offer the same excuse as I had to offer at p. 173 of my *Calendar of Norfolk Fines*, viz., that this part of the book was printed off while I was down with typhoid fever, and in this case the proofs were absolutely unread.

"Monumental Inscriptions in the Hundred of Tunstead."

"Norris' MS. Collections for Tunstead, Happing, and the Fleggs."

These, if ever I finish them, will probably conclude my private issues, and I can then get on with my *Norfolk Visitation* and the *History of the Eastern Association.*
